

New Image of High-end Conference

With European design masters, we use new design language to create new products and won the national patents. With Horion IFP, it can definitely upgrade the image of the conference room! Horion smart interactive flat panel integrates functions of six devices, including projector, electronic whiteboard, computer, display, advertisement player and audio equipment. It is a multi-purpose machine for conference demonstration, whiteboard writing and annotation, wireless screen mirroring, video conference and remote cooperation, make the modern conference be easy and efficient.

| Video Conference - Collaboration

Whiteboard Sharing / Writing Synchronization / HD Video Conference

The unique cloud conferencing system supports screen sharing with mobile phone, iPads, computers and interactive flat panels without space limit. It can realize real-time, face-to-face communication, sharing and collaboration through two-way touch screen.

| Wireless Screen Mirroring - Display

4K Screen Mirroring/Reverse Touch Control/Quad Split Screen

Horion interactive flat panel brings a new way of interaction and display. Images of computers, mobile phones and flat panels can be easily displayed on the same screen, easy to go on presentation, sharing and communication. Computer can be easy to start mirroring with Horion mirroring device, even in reverse control to realize two-way interaction. One screen can be divided into four parts, multi-screen display, supports mobile phones, computers, tablets and other devices, which allows multi-users, multi-devices to display simultaneously.

I Touch Handwriting - Creative

Pen Writing / Smart Form / Automatic Recognition

1MM detection precision, 20-point touch, brand-new writing software, single-point/multi-point writing modes. Two writing modes are available, intelligent handwriting algorithm, refined strokes to deliver amazing writing experience.

You can connect to mobile phones, stereos and other wireless devices via Bluetooth to transmit data, even connect to the printer to print.

It supports the insertion of graphics, 4K videos, and smart tables. The rich expression is only for the simple sharing experience.

Touch Handwriting

Writing on Horion interactive flat panel with writing pen is fluent and smooth, and the color thickness can be freely selected. Comes with its own stroke to give you the real writing experience on a white paper.

Erase with the Back of Your Hand

The back of the hand can be used as an eraser, with a light wipe, the content on the whiteboard can be erased.

Small Screen Mirroring to Big Screen

Independent R&D system of mirroring, supports Android/iOS devices, tablets, computer and other smart devices.

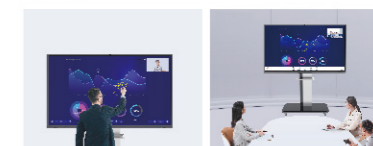

Horion interactive flat panel can interact with laptops and splicing large screens, making the information transfer convenient and effectively.

Zero-distance Cooperation

The unique cloud conferencing system supports screen sharing with mobile phone, iPads, computers and interactive-flat panels without space limit. It can realize real-time, face-to-face communication, sharing and collaboration through two-way touch screen.

13MP Camera

Built-in 13MP camera for clearer teleconference.

8-Array Microphone

Equipped with multiple voice algorithms such as echo cancellation, noise suppression, beamforming, etc., clear sound pickup, communication without barriers. Far-field pickup distance up to 8m, with no dead angle in the conference room.

High-quality Dual Speakers

With the digital sound system, bright and penetrating treble, rich bass, you will be shocked by the sound effect.

NFC One-click to Start Mirroring

A mobile phone with NFC function, to approach to the NFC area at the bottom of panel after turning on NFC, then you can quickly share the screen at once. Support 4 devices to display on the same screen simultaneously, multi-screen collaboration, information sharing, effectively reducing the cumbersome matters of document sorting, printing, and distributing before the meeting, easy to go on presentation, sharing and communication. Quickly call out the whiteboard software by moving Horion smart pen cap close to the NFC area, convenient and fast.

Horion Wireless Sharing

Connect to the WIFI hotspot created by Horion interactive flat panel, scan the QR code after entering "Horion Wireless Sharing" app on the panel, select the pictures/files which are needed to share on the page of your smart device to realize fast wireless sharing.

Horion M5A - Extraordinary Conference

Horion M5A interactive flat panel, a professional-level all-round smart conference pioneer, has a wider range of scene collaboration capabilities, allowing zero-distance collaborative office. To realize video conference, whiteboard writing, wireless mirroring, remote collaboration and more functions only need one Horion M5A. Functionable with simple operation.

Android 8.0 + WINDOWS 10

Self-contained Android system, Windows is optional.

Zero Fit Screen

The distance between the tempered glass and the screen is 0, which can effectively prevent light reflection. Show you the excellent display and writing experience.

13MP Camera+ 8-Array Microphone

The high-quality screen and clear audio-visual pickup system bring the excellent video conferencing experience to you.

NFC

Built-in NFC function, you can call out the white board software with the supplied smart pen at any time. One-click to start mirroring could also be supported with NFC.

New UI Design& Rich Apps

Swipe right to enter the frequently-used interface, swipe left to enter all applications, simple interaction and easy use; The UI design blends in with the elegant purple of Horion, high-end business and simple fashion design style, take a new look on vision; In pursuit of the better user experience, the Horion R&D team regularly pushes OTA upgrade package according to the comprehensive evaluation of new functions and users' feedback monthly and continuously optimizes the wonderful interactive performance of products.

I Horion Conference Management

Integrated Intelligent Control System/ Conference Doorplate / Enterprise Cloud

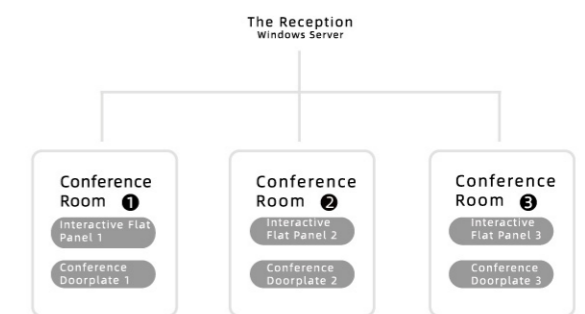

Horion is committed to making conferences easier and helping enterprises improve the efficiency of office scenes in a comprehensive and in-depth manner.

Integrated Intelligent Control System: Simultaneously control multiple interactive flat panel, which can realize application scenarios such as information release and conference room management.

Conference Doorplate: Display the details of the meeting, submit requirements (end the use of the meeting room, book tea, etc.).

Enterprise Cloud: it supports one-click to save blackboard-writing and documents, provides storage space for important meeting documents of enterprises.

The conference management system is a software&hardware systemspecially designed for managing multiple conference rooms. The administrator does not have to go to the designated meeting room to confirm the status, and check the usage of each meeting room directly by the server side(whether it is in use, other requirements or not, etc.);

Horion - Shenzhen R&D Center

Shenzhen Horion Intelligent Technology Co., Ltd. is committed to becoming a leading provider of smart products and solutions in China. Located in the high-tech industrial park in Bantian, Shenzhen, it has set up multiple industrial parks in Shenzhen and Huizhou and many after-sales service outlets throughout the country.

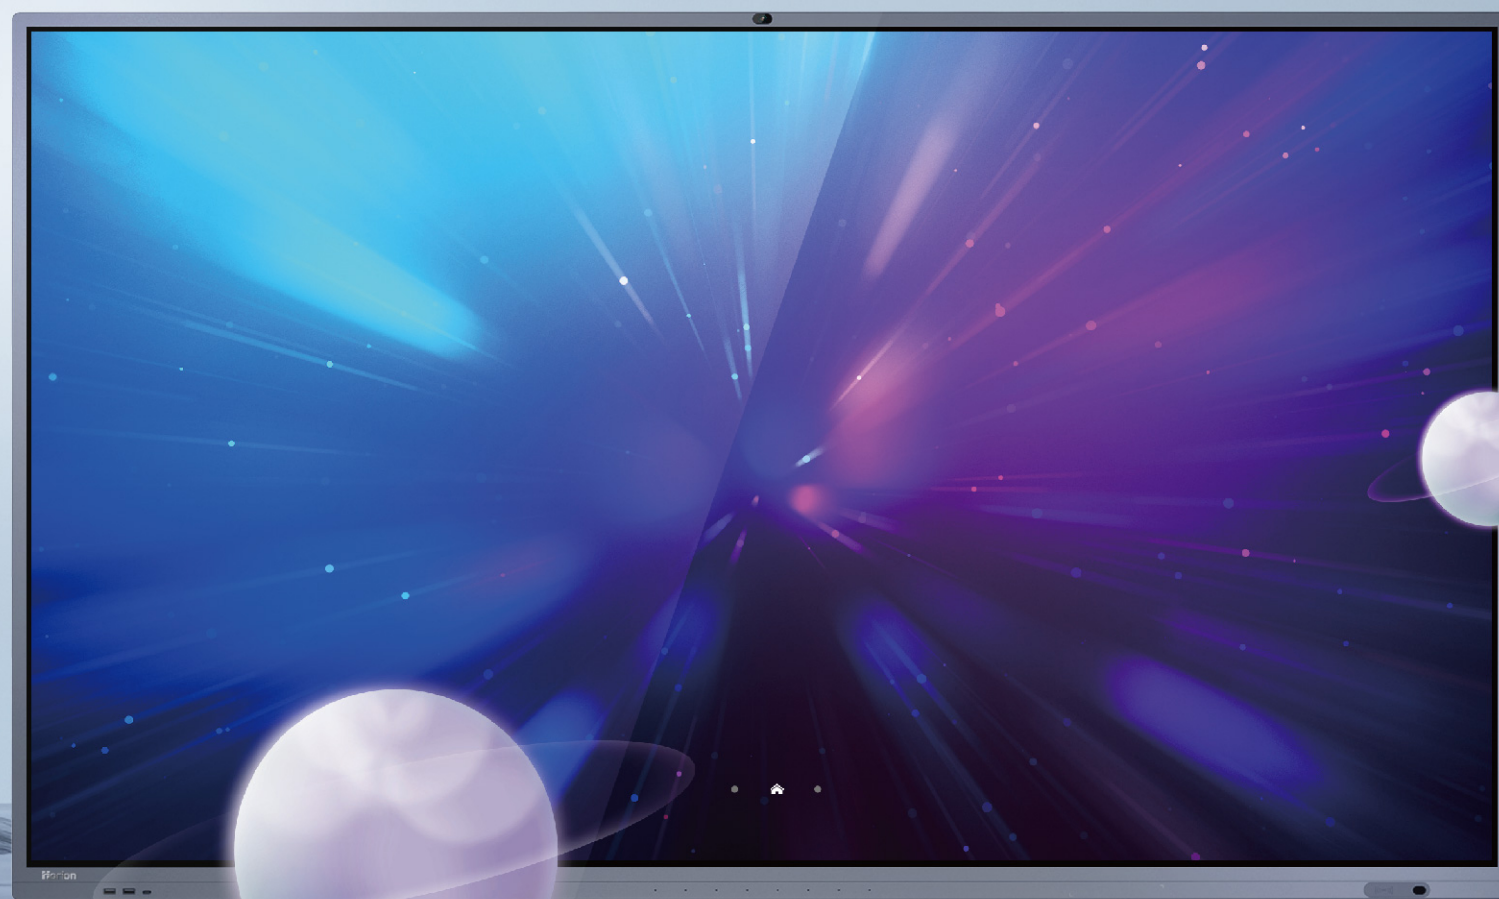

Horion adheres to the corporate mission of "Intelligence Transforms the Future" and hopes to popularize the smart interactive flat panel among enterprises to help create high-end conference images. Horion smart interactive flat panel is not only a device for smart conference, but also a cross-era product that enhances corporate image, efficiency and intelligence. It can be applied to various scenarios such as business conferences, corporate offices, education training, and product display. It is powerful and easy to use.

Horion has always been focusing on product R&D with professionalism, dedication and innovation, and been committed to leading the breakthrough and innovation of commercial display products. Horion has never stopped exploring new conference solutions from a future perspective. Horion is developing cutting-edge technology to facilitate smart conferences and to bring forth a new era of smart business conferences.

Horion-Huizhou Factory

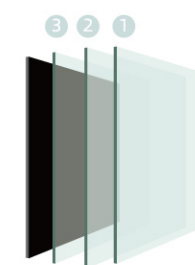

4K
3840X2160

I 4K Commercial Screen

3840×2160/ Commercial Grade / High Brightness

3.2mmAG anti-glare tempered glass, grade 7 MOHS hardness, effectively eliminating strong glare, and have a better writing experience; 4K UHD screen adopts high-quality commercial screen and the fifth-generation chip of color engine, which can make the picture quality closer to the natural colors.

- ① Touch Protection Layer
- ② Anti-glare Protection Layer
- ③ Tempered Glass Layer

Exquisite Appearance

The minimalist design incorporates ideas of oriental aesthetics and European masters, to make M5A a stylish high-end artwork, contracted but not simple.

The zero fitting process is firstly adopted to revitalize the visual sense. Every frame is like the scene of a blockbuster in the cinema. The screen glass and display screen adopt the industrial zero fitting process, which presents more delicate picture quality and better writing experience. It's designed with AG tempered glass, anti-finger print coating and anti-glare protection layer.

Screen Mirroring Device

One-click to Start Mirroring

Smart Pen

Three Keys Design for Manipulating Ease

Writing Pen

Exquisite Design and Easy Operation

The pianopaint frosting process combines simple artistic spirit, elegant and extraordinary; intelligent magnetic design, extremely light pen body, easy to use; annotate smoothly.

Microphone

Three Keys Design for Simple Operation

360° sound pickup, sound positioning, ultra-long-distance communication, AI noise reduction; built-in lithium battery, 10H ultra-long talking; Calling by USB, Bluetooth, AUDIO cable is supported, easy to use, and compatible with a variety of devices.

Conference Doorplate

Smart Conference Management System

10.1" IPS screen: support meeting reservation/tea reservation/meeting system management, intelligent in allocating meeting rooms, one-click to manage meetings, 1+16G storage, and wireless network connection

Mobile Stand

Exquisite, and Movable

HK76, brand-new base, dedicated-for Horion interactive flat panel, made of high-quality carbon steel, safe, reliable, and convenient to move.

Camera

Seamless Collaboration of HD Video

110° viewing angle, 4K resolution, compatible with most video conferencing software, without additional drivers, plug and play, stable and smooth.

Computer Module

Powerful Chip Architecture with Great Performance

The computer mould adopts Intel Core, which supports energy-saving and extended memory 64 technology, with powerful running ability. It can be compatible with various video software, users can install freely to meet individual needs.

Application Scenarios

Horion empowers efficient development of enterprises by means of science and technology. Its products have been fully used for business conferences, corporate office, education and training, product display and other application scenarios, which comprehensively enhance the high-end image of enterprises to boost the market competitiveness of enterprises.

Conference

Horion can promote the efficiency of a meeting. Conferences can be held without limitation of office space and office distance at any time any place, achieving efficient collaboration.

Training

Easily realize remote training and help training institutions to achieve diversified, informationalized, convenient knowledge dissemination.

Commercial Display

Diverse information can be flexibly released and displayed, with intelligent centralized control management, all things are under control.

Education

It aims to build modern classrooms to facilitate the sharing of teaching resources, collaboration in teaching affairs conferences, and the interconnection and transmission of multi media tools.

M5A Smart Interactive Flat Panel

The ultra-narrow edge is integrated with the whole machine design, with excellent appearance and talent; 4K HD large screen, Hi-Fi sound system, sensory awakening; handwriting recognition reconstructs the traditional, more convenient ways of expression; brand-new NFC function supports one-click to mirroring, easy to share; multi scenario collaboration, great potential, beyond your imagination.
