50-Point Multi-Touch

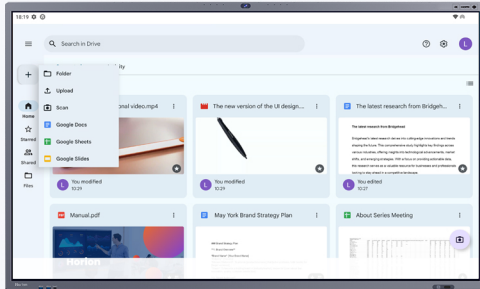

60W Speaker

Leverage the Power of Google's Ecosystem

With Google EDLA (Enterprise Device Licensing Agreement) certification, our interactive whiteboard ensures seamless access to all Google apps and services. This certification guarantees that users can collaborate online, edit content in real-time, and share documents effortlessly, all within the robust Google ecosystem.

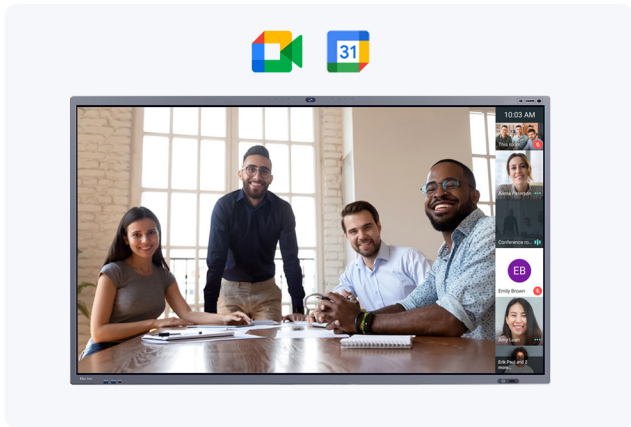

Access Anytime, Anywhere

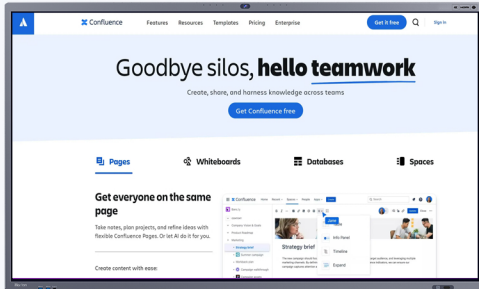

Meeting content is automatically saved to Google Drive, making it easy to access, edit, and share at any time.

Ecosystem Integration

Seamlessly integrate with tools like Google Meet and Google Calendar to create a one-stop meeting solution.

Online Collaboration Tools

Integrate Google Docs, Sheets, Slides, and other office tools into the whiteboard for real-time editing and sharing of meeting content.

Experience Unmatched Performance

The M6APro EDLA not only integrates seamlessly with Google's ecosystem but also maintains an exceptional performance experience.

Powerful Android 13.0 OS

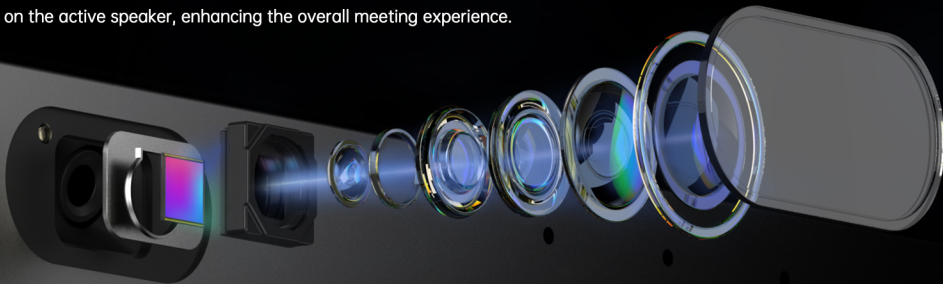

Android 13.0 enhances the interactive whiteboard experience with its advanced performance, seamless multitasking, and intuitive interface, offering a smoother, more responsive user experience and compatibility with a wide range of apps.

Sharper and Smarter Camera

Featuring a 48MP camera, the electronic whiteboard offers exceptional clarity for detailed visuals. The auto-framing function ensures that participants are perfectly centered in the frame, while speaker tracking technology keeps focus on the active speaker, enhancing the overall meeting experience.

Dual Wi-Fi- No More Meeting Hiccups

Using the latest Wi-Fi tech with duplexing dual-band support (2.4G and 5G), it is perfect for smooth video conferences and wireless screen sharing.

Unleash Creativity with Horion Whiteboard

Unlock your creative potential with the Horion whiteboard. Its vibrant display and interactive features not only enhance meeting efficiency but also foster greater engagement and interaction in the classroom, making every session more dynamic and productive.

50 Touch Points

With 50-point multi-touch capability, the electronic whiteboard allows multiple users to interact simultaneously, enabling collaborative brainstorming, seamless presentations, and dynamic group activities.

Ultra-Low Latency Writing

Experience ultra-low write latency with M6APro EDLA electronic whiteboard, delivering a writing delay of less than 30ms, making it feel as natural and responsive as writing on paper.
